

MEGA SporeBiotic™ GUMMIES

Fruity MegaSporeBiotic™ Gummies are a simple, convenient, and delicious way to get a daily dose of digestive health support! These tasty, easy-to-digest, chewable gummies contain four strains of the health-supportive, spore-forming *Bacillus* bacteria found in Microbiome Labs' flagship spore-based probiotic supplement, MegaSporeBiotic™. These enticing and efficacious gummies are specially formulated with research-backed spore-based probiotics to maintain optimal gut and immune support for children aged 4 years and up—and for adults who are children at heart! **

- Supports gut microbial diversity**
- Maintains levels of crucial, health-supportive, commensal gut bacteria**
- Supports healthy gut barrier and immune function**
- Maintains healthy gut microbiome function**
- Backed by multiple research studies and extensive clinical validation**
- Proprietary Probiotic Blend: 2 billion CFU per gummy **
- Natural Mixed Berry Flavor (blueberry, strawberry, blackberry)**
- No refrigeration required**
- No artificial flavors or colors**
- Soy-free and dairy-free**
- Non-GMO**

Spore-Based Probiotics Delivered with Flavor & Convenience

The gut microbiome is a dynamic ecosystem easily disrupted by environmental and lifestyle factors. When it is imbalanced—in a state of "dysbiosis"—localized digestive discomforts, gut health challenges, and body-wide issues may occur. An imbalanced microbial environment can negatively impact kids' daily lives. MegaSporeBiotic™ Gummies is a 100% spore-based proprietary probiotic blend that supports a healthy gut microbiome by promoting microbial diversity, maintaining a healthy gut barrier, and supporting immune function and its protective responses.

MegaSporeBiotic™ Gummies contains four *Bacillus* spore-forming probiotic bacterial strains that are naturally designed to navigate digestion with 99.99% survivability. They arrive in the gut, transition from spore to active form, and provide a practical and functional way for the gut microbiome to receive essential daily support.

MegaSporeBiotic™ probiotic gummies combines spore-based probiotics' survivability with an innovative delivery method to support gut microbiome health and simplify daily life. Convenient and easy to consume, they're a no-fuss addition to any daily routine! **

Ingredient Highlight:

Bacillus indicus HU36™: *B. indicus* has been shown to support the production of highly bioavailable carotenoids, including astaxanthin, beta-carotene, lutein, lycopene, and zeaxanthin. It also supports the creation of quinols and vitamins at the absorption site.

Bacillus clausii SC109: *B. clausii* is exceptionally stable in acidic conditions and maintains balanced microflora and healthy colonization of the intestinal mucosa. It supports healthy immune function and upper and lower respiratory health. It also supports normal bowel movements, gut motility, and transit time.

Bacillus subtilis HU58™: *B. subtilis* has clinically substantiated benefits and proven use as probiotic support. It maintains balanced and beneficial immune function, supports healthy GALT development, and supports healthy digestive transit time, gut motility, and gut barrier function. It also supports the production of B vitamins, vitamin K2, short-chain fatty acids, and the fibrinolytic enzyme nattokinase.

Bacillus coagulans SC208: Studies report that *B. coagulans* can impact intestinal issues by maintaining microbial diversity and supporting host immune function, digestion, and metabolism. As such, it may help overcome occasional diarrhea, occasional constipation, and colitis. *B. coagulans* also supports the production of the L+ optical form of lactic acid.
